

# BABY SAFE CRIB FINISH

## **Baby Safe Crib Finish**

This is a zero VOC, natural wood finish for cribs, toys, cutting boards and kitchen utensils. We use only FDA GRAS ingredients for this wood finish. Baby Safe starts with a pure flax oil that is filtered and refined. It has less odor than any flax oil we have ever seen. Then beeswax is cooked into the oil slowly using a special technique done by hand in our Asheville, NC facility. This is the same process invented in 2006 by our founder for his son (shown in picture above).

ZERO VOC!

Beeswax

Flax Oil – filtered  
and refined for  
purity.
